SCHOOL BUS ROUTE STOP or CHANGE REQUEST

School bus routes are established following Ministry of Education funding guidelines and School District Policy 3541. Routes may be established where distances from the designated school are greater than 4 km and taking into consideration the safety of students, distances, road conditions, public transportation, number of students involved, and the cost of delivering the service.

The Board may provide a transportation assistance allowance to those students who reside 3.2 km or further from the nearest existing bus stop and where establishing or extending a route is not reasonable.

Generally, bus routes are established along major roadways. There are many side roads within our community that cannot practically be served by school bus. Where possible, school bus stops are established at intersections approximately .8 km (1/2 mile) between stops. It is not our practice to establish bus stops at private residences.

In order to assist us in reviewing your request, please provide the following information.

Return completed forms to the Transportation Department: transportation@sd57.bc.ca or fax: 250-561-6809

PLEASE PRINT

Date: _____
